

External Programme Advisory Committees and Consultation Networks

CPIT is committed to working with the industries, professions and communities we serve. One way of achieving this is through Programme Advisory Committees or Consultation Networks, listed below. Each programme is supported by a group, of varying sizes and composition depending on the needs of that programme. The Chair appointed by the group, is usually external to the Institution. Most groups include student or former student representation, as well as staff representatives (whose names are not included).

The members listed have given their permission to publish their names in the CPIT Annual Report. We are grateful for their support and appreciate their input throughout the year.

Recreation

A Consultation Network, replacing the previous Advisory Committee Structure, was set up in 2004 to provide advice and support to a number of recreation programmes. The process involves each core staff member identifying at least one industry or educational mentor/contact to provide feedback and critique on individual teaching practice, content and programme direction. The information is recorded electronically in a master journal and/or notes and emails kept as a record. As required, information on the course aims, content, graduate profiles, and programme structure is sent to people on the following list for review critique.
